MICROBIOLOGY WITH CONFIDENCE

Vitek 2™
ID & AST Cards
RELIABLE • SAFE • RAPID

FOCUS ON WHAT MATTERS

Designed for VITEK® 2 automated systems, VITEK® 2 identification (ID) and susceptibility (AST) cards provide reliable and accurate results for clinically important bacteria and yeasts^{1,2,4,5}.

Results You Can Trust

The VITEK® 2 Advanced Expert System™ software lets you focus your time where it is most required in the lab. The Advanced Expert System validates every result and quickly identifies those truly needing a Microbiologist's valuable time and attention. This allows the majority of results to be quickly and confidently reported to clinicians without need for review^{2,8,11,13,15}.

Efficiency Through Automation

VITEK® 2 cards offer the shortest preparation time in the industry, considerably reducing labor costs^{3,7,9,10,14}. They also have the least contaminated waste, offering up to 64% cost savings for disposal compared to other systems^{6,10,12}. The cards provide increased standardization and automated, same-day results helping clinicians to optimise antibiotic therapy sooner^{2,3}.

RAPID, FLEXIBLE, EFFICIENT

Each self-contained, disposable test card provides rapid and accurate species-level identification or susceptibility results with accurate MICs* based on reference CLSI** and ISO MIC methods and EUCAST***, US FDA****, or CLSI breakpoint interpretations^{1,3,4,5,7,8,10}.

Innovative and flexible design:

- Each card contains microwells with ID biochemicals or AST antimicrobials
- Ready and simple to use
- Pre-applied barcodes for maximum traceability
- EUCAST and CLSI compliant AST formulations available

Up to 50% fewer preparation steps than other systems,^{3,9,10}:

- Inoculation with a simple, standardised suspension of organism in saline
- No reagent addition

Unique, safe, closed consumable:

- Optimal for user safety
- No aerosols, splattering, or spills
- Small, lightweight cards save on contaminated disposal costs and storage space

BROAD AND EXPANDING ID/AST TEST MENU

IDENTIFICATION CARD TYPES:

- GN (Gram negative bacilli) 156 organisms
- GP (Gram positive cocci & bacilli) 120 organisms
- ANC (anaerobes & Corynebacteria) 89 organisms
- NH (Neisseria & Haemophilus) 26 organisms
- YST (Yeast) 50 organisms

ANTIBIOTIC SUSCEPTIBILITY CARD TYPES*:

- Gram negative Bacilli 76 antimicrobials and ESBL[†] test
- Staphylococci &/or Enterococci 55 antimicrobials, 4 high level aminoglycoside screens and ICR^{††} test
- Streptococci 14 antimicrobials and ICR test and gentamicin synergy
- *Streptococcus pneumoniae* 23 antimicrobials
- YST (Yeast) 6 antimicrobials
