

PROGNOSIS BIOTECH

IS COMMITTED TO THE FIGHT AGAINST COVID-19
OFFERING ACCURATE TESTING SOLUTIONS TO
SCIENTISTS & HEALTHCARE PROFESSIONALS

PROGNOSIS BIOTECH

COVID-19
ANTIBODY TESTS
ELISA KITS

A RELIABLE DIAGNOSTIC TOOL THAT DETECTS IF AN INDIVIDUAL HAS BEEN INFECTED WITH SARS-COV-2

BIO-SHIELD 2019-NCOV ELISA KITS PROVIDE ACCURATE INFORMATION ABOUT POTENTIAL IMMUNITY AND INFECTION RATES

- Semi-quantitative ELISA tests with single-break strip plate of 48 wells or 96 wells
- High Sensitivity and Specificity
- Accurate results in under two hours
- Compatible with automated ELISA systems
- Supplementary method to molecular test results

BIO-SHIELD 2019-NCOV TOTAL IMMUNOGLOBULINS

determines the IgA, IgM, IgG antibodies against SARS-CoV-2

- The test demonstrated excellent sensitivity and specificity in the latest clinical performance study (98,7% and 100% respectively), in which 76 positive and 86 negative samples were examined.
- 100% sensitivity and specificity for samples that were collected after the first 7 days from the onset of the symptoms. *

BIO-SHIELD 2019-NCOV IGM

determines the IgM antibodies against SARS-CoV-2

BIO-SHIELD 2019-NCOV IGG

determines the IgG antibodies against SARS-CoV-2

ELISA KITS ENABLE MORE RELIABLE ESTIMATES OF SARS-COV-2 PREVALENCE OFFERING VALUABLE INSIGHTS FOR EPIDEMIOLOGICAL STUDIES, WHILE THEY ARE USEFUL FOR THE EVALUATION OF ASYMPTOMATIC INDIVIDUALS

* May 5, 2020, at the Second Department of Microbiology, School of Medicine, of the Aristotle University of Thessaloniki, which serves as one of the official Reference Laboratories for SARS-CoV-2 in Greece.

COVID-19

ANTIBODY TESTS

LATERAL FLOW KITS

FAST & RELIABLE

- Increased Sensitivity and Specificity
- Easy-to-use method
- Appropriate for field use, no need for equipment or special facilities
- Low procedure time (10 mins)

RAPID TEST 2019-NCOV TOTAL IG

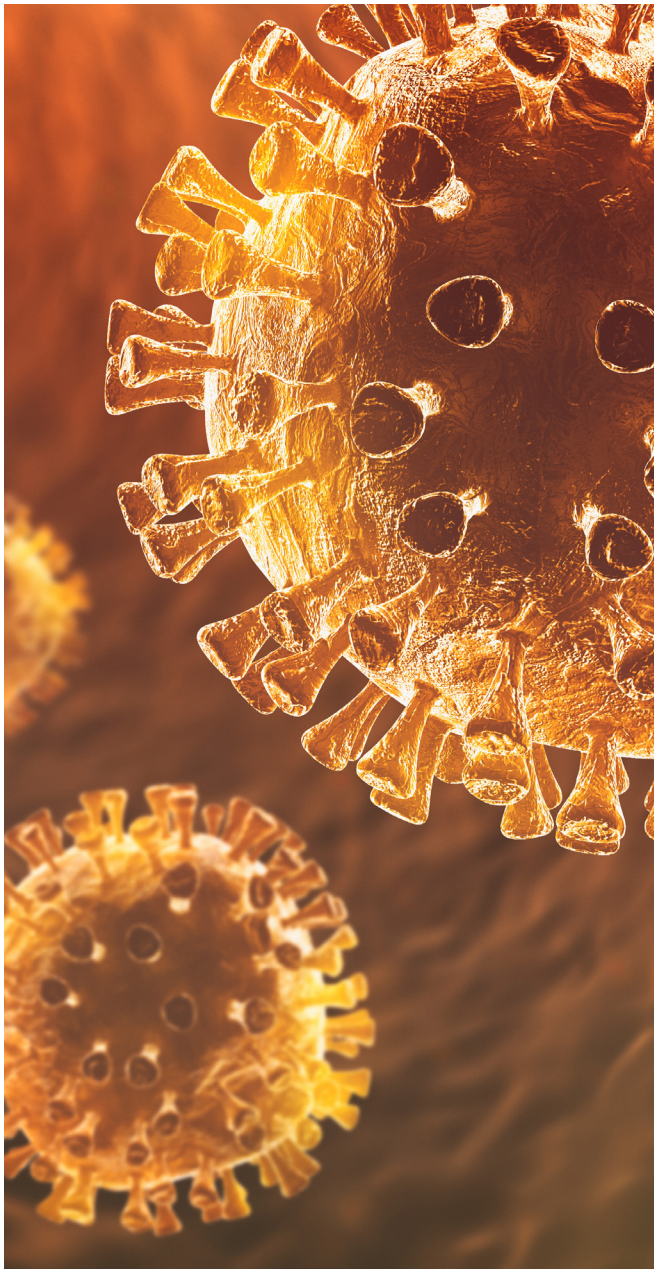

determines the total antibodies (IgA, IgM, IgG) against SARS-CoV-2

RAPID TEST 2019-NCOV IGM/IGG

determines the IgM & IgG antibodies against SARS-CoV-2

APPLICATIONS:

- Medical professionals: to have a rapid indication about patients' exposure to the virus
- Countries' entry points: airports, ports & customs
- Tourism industry: to maintain a disease-free environment
